Mustafa Anwar Fadul Ahmed

Fullstack Developer (ASP.NET, C#, Python, JavaScript, GO, PHP, Node.js, React, Angular) & DevOps Engineer

Contact Information

- **Location:** Saudi Arabia – Iqama Transferable
- **Phone:** +966534757952
- **Email:** mustafaanwar1998@gmail.com
- **LinkedIn:** https://www.linkedin.com/in/mustafa-ahmed-3249a3211
- **GitHub:** https://github.com/Mustafa1998-tech
- **Saudi Council of Engineers (SCE) Membership:** ID 1160532 | Valid Aug 2025 – Aug 2026

Professional Summary

Highly skilled Fullstack and DevOps Software Engineer with extensive experience across the entire software development lifecycle, from frontend user interfaces to robust backend systems and cloud infrastructure. Proficient in a diverse technology stack including **ASP.NET Core, C#, Node.js, GO, PHP**, and modern JavaScript frameworks like **React** and **Angular**. Expertise includes designing and implementing scalable APIs, Microservices, and automation solutions. Strong hands-on experience with leading cloud platforms: **AWS, GCP, and Azure**. Holds multiple professional certifications in DevOps, Full Stack Development, Cybersecurity, and Cloud Computing.

Core Skills

- **Frontend Development:** React, Angular, TypeScript, JavaScript, Ajax, jQuery, HTML5, CSS3.

- **Backend Development:** ASP.NET Core, C#, Node.js, GO, PHP, Python (Django/Flask), Web APIs, MVC, Entity Framework.
- **Programming & Scripting:** C#, Python, GO, PHP, JavaScript, TypeScript, Bash.
- **Software Engineering & API Development:** API Developer, REST APIs, Microservices, Full Stack Development, MVC.
- **DevOps & Cloud:** AWS, GCP, Azure, IBM Cloud, GitLab CI/CD, Jenkins, Docker, Kubernetes, Helm, Ansible, Terraform.
- **Databases:** SQL Server, MySQL, PostgreSQL, MongoDB.
- **Infrastructure & Networking:** Linux, Nginx, Apache, Networking & Security.
- **Monitoring & Logging:** Prometheus, Grafana, ELK Stack.
- **Version Control:** Git, GitHub, GitLab.

Professional Experience

Meshari Al-Shathri Engineering Consultancy – Saudi Arabia .NET Developer & System Programmer | Nov 2025 – Present

- Developed and managed the **Quality Laboratory Project** for the **Qassim Region Municipality** using **.NET** technologies.
- Designed and implemented a dedicated **inventory/enumeration system** for the Quality Laboratory to enhance data tracking and reporting efficiency.
- Provided **part-time technical support** to ensure system stability and resolve software and technical issues.

ZAC Trust Valley – Sudan Software Engineer | DevOps & Cloud | .NET & Python Developer | Jan 2024 – Feb 2025

- Developed enterprise applications using ASP.NET Core (C#) and Python (Django/Flask).
- Designed and implemented REST APIs with SQL Server and PostgreSQL.
- Built CI/CD pipelines with GitLab and Jenkins for automated deployments.
- Containerized applications using Docker and deployed with Kubernetes & Helm.
- Managed AWS and GCP cloud infrastructure ensuring scalability, security, and reliability.

- Implemented Python-based automation and computer vision projects for data analysis.

Najah Sunhat Al-Mutairi General Contracting Company – Saudi Arabia IT & Systems Support | Jul 2022 – Jul 2023

- Provided IT support for hardware, software, and networking systems.
- Assisted in migrating legacy systems to .NET-based solutions.
- Managed users, access controls, and implemented IT security policies.
- Conducted performance monitoring, backups, and disaster recovery procedures.

Certifications & Membership

- Microsoft Certified: .NET Backend Developer – Microsoft
- IBM DevOps and Software Engineering Professional Certificate – IBM & Coursera
- IBM Full Stack Software Developer Professional Certificate – IBM & Coursera
- Secure Full Stack MEAN Developer – EC-Council & Coursera
- AWS Solutions Architect Training – Coursera
- Google Cloud Networking Specialization – Coursera
- Cybersecurity Analyst – IBM & Coursera
- ISC^2 SSCP Specialization – Coursera
- Fundamentals of Ansible – Coursera
- Generative AI with LLM – Coursera
- Data Science Fundamentals – IBM & Coursera
- Saudi Council of Engineers (SCE) Membership – Valid until Aug 2026

Projects

- **Road Maintenance System (.NET Core + SQL Server):** Built a road maintenance management system to track issues, schedule repairs, and monitor project progress. Implemented REST APIs and SQL Server integration with .NET Core.
- **ERP System (Django + PostgreSQL):** Developed an ERP system covering sales, inventory, accounting, HR, and user management. Implemented authentication and role-based access control.

- **UCL Match Analysis (Python, OpenCV, Computer Vision):** Created a computer vision project to analyze UEFA Champions League matches, including player tracking and event detection.
- **Chatbot (Python, NLP):** Implemented a chatbot with Python and Natural Language Processing (NLP) libraries to handle Q&A and automate customer interactions.
- **CSV Analyzer (Python, Pandas, NumPy, Matplotlib):** Designed a tool to process CSV datasets, extract insights, and visualize data trends.

Education

Bachelor's Degree in Telecommunications Engineering

- Al Mughtarbeen University, Sudan | 2016 – 2021
- Additional Professional Development in .NET, Python, DevOps, Cloud, Cybersecurity, and AI through Coursera.

Languages

- Arabic – Native
- English – Proficient
